

BADGE BOARD

Centralise your participants' dosimeters

LANDAUER® thinks outside the badge and offers tools to help you in the daily management of your dosimetry.

STORAGE RACK TO COLLECT, STORE AND DISTRIBUTE DOSIMETERS

■ A tool to manage your dosimeters

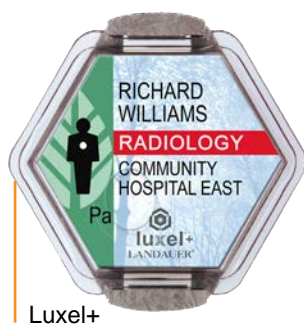

Boards bring an easy way to distribute your dosimeters (Luxel+®, MonoRing®...) and a reminder for participants of the need to exchange their exposed badges with a «returned dosimeter» shelf.

■ A way of creating a dosimeter exchange point

A place to put the control dosimeter, shelves to leave the participants badges when they are not being worn: less loss, less risk of non returned dosimeters.

■ The possibility to create a radiation protection centre in each department

Central location for information sheets, messages, notices...

Luxel+

Radiation passbooks

For classified workers, LANDAUER can supply radiation passbooks in accordance with the Outside Worker Regulations.

Employers must ensure that their outside workers – i.e. classified persons who work in controlled areas designated by the employer – have valid and up-to-date radiation passbooks.

More information on demand.
